

## NEWS RELEASE

26 July 2016

### Valeport swells tide measurement offer with new turnkey solution

Valeport has introduced a new self-contained tidal observation solution, the [TideStation](#), which optimises performance of instrumentation and provides a simple to install and maintain [tidal observation hub](#).

TideStation has been designed to be flexible in its configuration and has Valeport's industry leading tide gauge system at its core. The compact and robust TideStation unit offers pressure, radar and hybrid tidal observation techniques coupled with interfaces to other meteorological, telemetry and third party systems.

Simplicity of installation and use was at the forefront of the TideStation's development. The single unit includes all infrastructure required to maintain power to the tide and meteorological equipment and communications system contained within.

Specifically designed as a low-cost turn-key solution, TideStation is suited to a broad range of sectors including port and harbour operations, surveying, dredging and many other applications.

Accessing data from the [water level monitoring equipment](#) within the TideStation is easy, it is recorded locally and then broadcast to a chosen command and control point as

VAT No: GB 165 8753 67 Registered in England No: 1950444

required. This can be enhanced with the addition of Port-Log.net from Oceanwise for data management and publishing.

Internal battery power is provided along with options to do this externally via solar panels or ac mains. The TideStation is a natural extension to Valeport's tide gauge instrument portfolio, Kevin Edwards, sales and marketing manager commented:

“Successful monitoring efforts depend upon accurate data, Valeport delivers reliable instrumentation and the TideStation safeguards this equipment to help customers ensure they obtain the highest quality data easily and quickly. For customers, this turn-key solution gives them value for investment as it offers reassurance that their environmental monitoring equipment is easily and correctly installed within a durable housing which will prolong performance.”

The [TideStation](#) is available to order now. For more information contact: [sales@valeport.co.uk](mailto:sales@valeport.co.uk) or visit [www.valeport.co.uk](http://www.valeport.co.uk).

Valeport designs and manufactures instrumentation for the oceanographic, hydrographic and hydrometric communities with a worldwide customer base that includes: environmental, defence, oil and gas, renewable energy, construction, dredging and civil engineering sectors. Visit [www.valeport.co.uk](http://www.valeport.co.uk) for more information.

ENDS

- Valeport is the UK's leading manufacturer of oceanographic, hydrographic and hydrometric instrumentation.
- Valeport designs and manufactures instrumentation for the oceanographic, hydrographic and hydrometric communities with a worldwide customer base that includes: defence, environmental, oil and gas, renewable energy, construction, dredging and civil engineering sectors.
- Valeport has supplied to the subsea sector since it was established in 1969, now an independent, family owned business, Valeport employs more than 80 people from their base in Devon and works with a global network of agents to ensure a responsive and efficient worldwide service.
